

Flying the iPad

If you have made the transition to the iPad, or are thinking about it, this seminar is for you. We will discuss the regulatory requirements for the Electronic Flight Bags for Part 91 operations under both VFR and IFR conditions. We'll review the iPad hardware and some of the most popular aviation applications used today. We'll plan a flight using ForeFlight and demonstrate some of the tricks learned over the past few years on how to make it an effective tool in the cockpit. Bring your iPads and follow along.

Directions: For directions to this event please contact Tom Woods at t_woods@hotmail.com.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
